

Overview of Service Connection Requirements:

The following is a brief overview of Windermere Water & Sewer's requirements. The rates, terms and conditions for service are subject to change from time to time.

For more specific information, please contact the Utility offices at (403) 265-7037.

Remember that we require a minimum of 48 hours notice prior to scheduling any site meetings.

1. Fill out the Application for Sewer Service and return to the Utility.
2. Review, sign and return the Terms & Conditions. Payment (if any is required) is due at this time for any construction costs or costs incurred by applying for the CPCN.
3. Fill out the Sewage Connection Application and pay any applicable fees.

Sewer Service Pipes— as per the BC Plumbing Code.

- **Backflow Preventor** – to be installed on the pipe discharging into the Utility's system.
 - **Type of Service Needed** – Homeowner must contact the utility to determine if they will utilize an on-site grinder pump and force main or a gravity feed. This will determine the size of the pipe connection.
4. **Sewer Inspection:** Inspections for sewer connections **must be completed** by Windermere Water and Sewer staff **prior to back-filling of any connection points**. Builders are not allowed to connect to sewer without an inspection. Sewer connections **NOT** inspected by Windermere Water & Sewer will be dug up at lot owner's cost.
