

SEWAGE CONNECTION APPLICATION

1. APPLICATION FOR SERVICE

- 1.1 The customer may apply for connection of service at the Utility's office by the completion and execution of this Sewage Connection Application and by the payment of such charges as may be required pursuant to the current rate schedule.

2. CUSTOMER SEWAGE SERVICE CONNECTION REQUIREMENTS

2.1 **Service Pipes**

The customer shall be responsible at its cost to install sewer service piping on its property and to its premises from the Utility's facilities. No sewer service pipes or fittings shall be covered until the connection has been inspected by the Utility. 48 hours' notice must be given to ensure prompt inspection of the connection.

2.2 **Backflow Preventer**

If connecting to a low pressure system, the customer is required to install at its cost a backflow preventer on the sewer service pipe discharging into the Utility's system.

2.3 **Type of Service Needed**

Homeowner must contact the utility to determine if they will need a force main or gravity feed, which will determine the size of the pipe connection.

3. APPLICATION

- 3.1 Application is hereby made for sewage connection service for the property legally described as:

Lot# _____ Block # _____ District Lot # _____ Kootenay District Plan # _____

- 3.2 Customer's Name: _____
